PRODUCTS

MONITORS

BayPanel

Industrial Monitors for Rack-/ Console Mounting

This kind of monitors meet the harsh industrial requirements for durability, service and maintenance in the 24/7/365 application.

Highlights

Autophase / Autoscaling / Autotracking
Anti-reflective and antistatic mineral glass pane
6mm aluminum front panel
Mechanically protected connectors areas
Wide selection matrix, numerous options
Industrial certifications

BayQad

Stand-alone Monitors for Tripod Mounting

The passive cooling design of Baytek's BayQad monitors eliminates the need for ventilation openings. This design, in combination with the tough aluminum housing which is milled from solid aluminum, provides the ideal basis for all-over IP65 protection.

Highlights

Autophase / Autoscaling / Autotracking
Anti-reflective and antistatic mineral glass pane
Fully milled aluminum housing
Mechanically protected connectors areas
VESA Tripod mount
Wide selection matrix, numerous options
Industry, MIL and MED certifications / type-related

BQR

Rugged Monitors for Rack-/ Console- or Tripod Mounting

The BQR flat panel monitors were specially designed for long-term use in harsh conditions. To ensure years of fault-free operation in extremely severe conditions, the rugged chassis protects the electronics inside the monitors, developed using the latest long-life technology.

Highlights

Autophase / Autoscaling / Autotracking
Anti-reflective, heatable mesh or ITO mineral glass pane
Fully milled aluminum housing
MIL spec connectors
Microprocessor-controlled heating and cooling control
Operating temperature from -32 ° to + 55 °
Storage temperature from -40 ° to + 70 °
MIL and Maritim certifications / type-related

The appropriate solution for every requirement

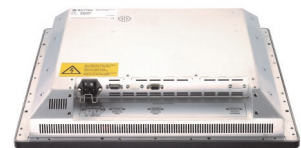

BPM

Maritime Monitors for ECDIS / Radar Applications

Baytek develops and produces the BPM monitor series for maritime/naval applications. The BPM series is designed and manufactured to withstand the harsh conditions encountered in the maritime environment.

Highlights

- Autophase / Autoscaling / Autotracking
- Anti-reflective and antistatic mineral glass pane
- ADA Automatic dynamic adjustment
- DTC deviation and tolerance adjustment
- Seawater-resistant aluminum housing and front panel
- Mechanically protected connection areas
- Wide selection matrix, numerous options
- Operating temperature -15 ° to + 70 °
- Maritime certifications

BQM

Maritime stand-alone Monitors for Tripod Mounting

Wherever monitors are required for critical maritime applications, Baytek products will be the right choice. Baytek has incorporated unique characteristics in the BQM series that will simplify integration in existing systems, expand the lifetime of the products and reduce the total cost of ownership.

Highlights

- Autophase / Autoscaling / Autotracking
- Anti-reflective and antistatic mineral glass pane
- Seawater-resistant aluminum housing and front panel
- Mechanically protected connection areas
- VESA Tripod mount
- Wide selection matrix, numerous options
- Maritime certifications

Gemelus

2-Axis Designer Tripod Monitors

The high-quality Gemellus monitor with integrated 2-axis tripod, combines perfect design with robust and long-lasting quality.

Highlights

- Autophase / Autoscaling / Autotracking
- Anti-reflective and antistatic mineral glass pane
- Fully milled aluminum housing
- Hidden cable routing
- Numerous options
- Industry and MED certifications
